Hanna's practice is focused on a number of transactional areas. She focuses on representing institutional investors in private equity investments, with a focus in equity co-investments, secondaries, joint ventures, LP investments and private investment fund formation. Hanna also represents private companies in equity and debt financings, domestic and international mergers and acquisitions, and general corporate matters. Her practice areas also include representation of asset managers and their affiliates on regulatory, compliance and transactional matters. She is also an active member of Sullivan's REITs Practice Group.

Client Highlights

Wonder Media Network (WMN) Acquired by the World's Largest Independent Podcast Company
Sullivan represented Wonder Media Network (WMN), a female-founded, audio-first creative studio based in New York City, in its sale to Acast, the world's largest

Sullivan
SULLIVAN & WORCESTER

independent podcast company. "WMN's mission is so tightly aligned with that of Acast - bringing important and changemaking stories to the world," said WMN CEO Jenny Kaplan. "Together, we will allow both creators and advertisers to reach new audiences, build successful businesses, and shape the future of audio."

Novomatic, an International Gambling Company Acquires San Francisco-based Present Creative

Sullivan represented Novomatic digital division Greentube in its acquisition of San Francisco-based Present Creative. Novomatic, an international gambling company, has announced its intention to expand into the U.S., and Sullivan serves as M&A deal counsel. Greentube's acquisition of Present Creative, Greentube's first US acquisition, was completed in November 2022. The acquisition will see Greentube further expand its presence in the U.S., where it has made significant inroads over the last 12 months, with the supplier bolstering its local product offering.

Artificial Intelligence Company Advised in Growth Financing

Sullivan represented Impact Analytics Inc. in its $5.5 million growth financing round led by Argentum Capital Partners. The company unites artificial intelligence with human validation that brings machine learning to the forefront of data-driven business decisions.
