

Sung Min Yoon

Associate

212 660 3063

syoon@sullivanlaw.com

Sung is an intellectual property attorney specializing in domestic and international patent prosecution, with particular experience in life sciences, pharmaceuticals, diagnostics, and therapeutic technologies.

Drawing from his experience as a former Patent Examiner at the United States Patent and Trademark Office (USPTO), Sung brings unique insights to his practice. During his tenure at the USPTO, he examined biotechnology patent applications with a focus on immunology, receptor-ligand interactions, antibody therapeutics, antibody-drug conjugates, and various cancer therapies.

His firsthand experience with USPTO examination procedures and research methodologies proves invaluable to clients. Sung's deep understanding of the patent examination process enables him to effectively identify relevant prior art and evaluate patentability. This comprehensive perspective allows him to develop strategic approaches to patent prosecution and guide clients toward successful outcomes.
